

Control your Mobile Workforce with PC Dispatch Software

**Across the Street
Across the Country
Diga-Talk⁺ has you covered!**

PC Dispatch Software

Apps Available for
iOS and Android
Smartphones and Tablets

The PC Dispatch Software provides you complete control of your mobile workforce. It works in conjunction with your mobile and portable radios. This simple to use interface is based on a multi-functional and visualization dispatching system. You can communicate and monitor individual or team activities. With the optional GPS tracking, you can get complete visibility as to where your field team is located and provide timely dispatching.
